Global Reach

Since 2002, SATPALDA has been working on various international geospatial projects spanning 60+ countries. The company rose to the need for satellite-based products from various industry verticals such as Oil & Gas, Mining, Urban Planning, Infrastructure, Environment, Telecommunication, Agriculture, Water Resources, etc. It was a time when the satellite-based high-resolution data market was in its infancy. The company has successfully endeavored to facilitate its users in public and private sectors through awareness and education campaigns. The extensive use of space technology applications has significantly contributed to enhancing the pace of socio-economic development in several sectors.

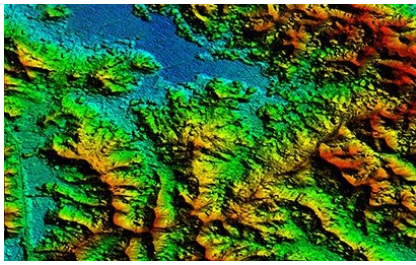

Over the last 20 years, SATPALDA has evolved into a full-fledged geospatial services company. SATPALDA has continuously developed expertise in a wide range of geospatial practices and procedures. Currently, SATPALDA is one of the most respected and recognized geospatial data companies in India, the Middle East, and Africa.
